

Every building permit application for a new dwelling now includes the requirement for street trees.

Where possible, trees will be planted on the boulevard in front of your property. If this isn't possible due to open ditches, underground services etc., they will be planted elsewhere in the municipality. In either case, you are still required to provide funding for these trees.

What is Required?

- 1 tree for each 9 m of property frontage
- Example - if your property is 15 m wide, you will be responsible for 1 tree
- A fee is required for each tree

How Does It Work?

- Our staff will go out to the property and determine what species of tree will work best with your site conditions.
